**DANGERFIELD INSTITUTE OF URBAN PROBLEMS CONTRACT COMPLIANCE
MONITORING REVIEW**

The Department of Children and Family Services (DCFS) Out-of-Home Care Management Division (OHCMD) conducted a review of Dangerfield Institute of Urban Problems (Dangerfield) in June 2011, at which time they had three six-bed sites and 18 DCFS placed children. Dangerfield is licensed to serve a capacity of 18 children, male and female, ages seven through 17.

Dangerfield's three sites are located in the Second Supervisorial District and provide services to Los Angeles County Department of Children and Family Services' (DCFS) foster youth. According to Dangerfield's program statement, its stated goal is to provide "a stable, constant, nurturing and predictable environment, one that is responsive to the individual child's needs."

For the purpose of this review, a sample of five currently placed children was selected, their case files were reviewed and the children were interviewed. At the time of the review, the placed children's overall average length of placement was four months, and the average age was 17. The files of three discharged children were reviewed to determine if the destination of placement was per their permanency plan and if the children were meeting their Needs and Services Plan (NSP) goals at the time of discharge. Four staff files were reviewed for compliance with Title 22 Regulations and County contract requirements.

To Enrich Lives Through Effective and Caring Service"

One child was prescribed psychotropic medication. We reviewed her case file to assess timeliness of the Psychotropic Medication Authorizations (PMAs) and to confirm documentation of psychiatric monitoring was maintained as required.

SCOPE OF REVIEW

The purpose of this review was to assess Dangerfield's compliance with its County contract and State Regulations. The visit included a review of the agency's program statement, administrative internal policies and procedures, five children's case files, and a random sampling of personnel files. A visit was made to the three facilities to assess the quality of care and supervision provided to children, and we conducted interviews with the children to assess the care and services they were receiving.

A copy of this report has been sent to the Auditor-Controller (A-C) and Community Care Licensing (CCL).

SUMMARY

Overall, the children interviewed indicated that they were provided with good care and appropriate services, were comfortable in their environments and were treated with respect and dignity. The direct care staff stated they had open communication with the placed children and did their very best to address the children's needs in a timely manner.

Our review revealed the need for Dangerfield to address minor physical plant deficiencies; however, these deficiencies did not pose a safety hazard to any placed children. Dangerfield also needed to develop timely and comprehensive NSPs to include all the required information in accordance with the Group Home Contract. Further, Dangerfield needed to ensure that the placed children attended school as required, made progress toward their academic performance, and that placed children received timely initial medical examinations. Additionally, Dangerfield needed to ensure that staff who have direct contact with children meet the educational/experience requirements.

Based on our review, the few aforementioned deficiencies revealed the need for more thorough documentation and ensuring the group home sites are maintained in good repair in accordance with Title 22 Regulations. Overall, however, Dangerfield is providing good care and services to placed children.

Dangerfield was receptive to implementing some systemic changes to improve compliance with regulations and the contract. The Director and her management staff were cooperative and agreed to address noted deficiencies in a Corrective Action Plan (CAP).

NOTABLE FINDINGS

The following are the notable findings of our review:

- The resident sign-in/sign-out log was not always adequately completed. The Administrator stated all staff will be trained by their facility manager by September 19, 2011, as to the procedure for signing residents in and out of the facility, including mandatory staff signatures, dates/times out and in.
- There were several deficiencies noted in the common areas and children's bedrooms at the three group home sites. At Site One, a doorknob at the front door entryway was loose and not fastened to the door. The heating vent on the floor in the kitchen area was covered with a wooden board and uneven carpet. Also, a phone dock in the kitchen was hanging from the wall and dragging on the floor. There were tiles missing from the wall in the first bathroom and bathroom drawers were covered with graffiti and filled with trash. There was a hole in the hallway drywall and needed repair. Inside Bedroom Two, a window was missing the frame to keep the glass pane in place.

At Site Two, Bathroom One had a hole in the ceiling above the bathtub that needed repair. The thermostat in the hallway was not secure and hung from the wall, and there was a small hole in the hallway wall needing repair.

At Site Three, all hampers were broken and needed to be replaced. The lock on the door which leads to the basement was broken and needed to be repaired or replaced. Further the bedrooms did not have doors for privacy and needed to be installed.

The Administrator stated that all of the items noted for all sites were repaired or replaced immediately. The only exceptions were the doors at Site Three, because more solid, durable doors needed to be ordered. The monitor verified that the doors were installed on September 15, 2011.

- Of the ten initial and updated NSPs reviewed, one was not timely and seven were not comprehensive in that they did not complete all the required elements in accordance with the NSP template. The Administrator stated effective immediately; the assigned Group Home Social Worker (GHSW) will create more detailed and comprehensive reports. The GHSW will also complete a review of all chart documentation, report cards, visitation logs and Special Incident Reports on the child for the period being done. This will ensure that the GHSW is able to address all areas required in the NSP report, including but not limited to, more detailed progress for the updated NSP reports, quality of family visits and documentation of all medical treatment received and all follow-up visits.
- There was no documentation on file confirming that Children Social Workers (CSWs) were contacted monthly by Dangerfield. The Administrator stated the CSWs will be contacted at least monthly to discuss progress and concerns, per the contract and the contacts will be documented on the CSW Log.

- Of the five children case files reviewed, one child did not have an initial medical examination conducted. The Administrator stated she would ensure children receive timely medical examinations.
- One staff who has direct contact with the children did not meet the educational/experience requirements. The Administrator stated that effective immediately, she will review employment verifications for all prospective employees. Dangerfield will only hire employees who meet the qualifications per their program statement.

A detailed report of our findings is attached.

EXIT CONFERENCE

The following are highlights from the Exit Conference held July 18, 2011:

In attendance:

Lorrie Irving, Administrator, Dangerfield Institute of Urban Problems; Patricia J. Cole, Group Home Social Worker, Dangerfield Institute of Urban Problems, and Jui Ling Ho, Monitor, OHCMD DCFS.

Highlights:

The Administrator was in agreement with our findings and recommendations. She was open to suggestions and would ensure that the minor physical plant deficiencies will be repaired and replaced immediately and all children will receive initial medical examinations within 30 days of placement. The Administrator expressed that staff members would continue to make every effort to ensure that all NSPs were comprehensive.

Dangerfield provided an approved written Corrective Action Plan (CAP) addressing each recommendation noted in this compliance report. The approved CAP is attached.

We will assess for full implementation of recommendations during our next review.

Rate Classification Level: 11**

The following report is based on a "point in time" monitoring visit and addresses findings noted during the June 2011 monitoring review.

CONTRACTUAL COMPLIANCE

Based on our review, Dangerfield Institute of Urban Problems (Dangerfield) was in full compliance with three of 10 sections of our contract compliance review: Psychotropic Medication; Personal Rights and Social/Emotional Well-Being; and Personal Needs/Survival and Economic Well-Being. The following report details the results of our review.

LICENSURE/CONTRACT REQUIREMENTS

Based on our review of five children's case files and/or documentation from the provider, Dangerfield fully complied with eight of nine elements reviewed in the area of Licensure/Contract Requirements.

We noted that the resident sign-in/sign-out logs were not always adequately completed. The Administrator reported that all staff were trained by their facility manager on September 7 and 14, 2011, as to the procedure for signing residents in and out of the facility, including mandatory staff signatures, dates/times out and in.

Recommendation:

Dangerfield's management shall ensure:

1. The resident sign-in/sign-out log is always adequately completed.

FACILITY AND ENVIRONMENT

Based on our review of Dangerfield, review of five children case files and/or documentation from the provider, Dangerfield fully complied with four of six elements in the area of Facility and Environment.

At Site One, located at 1433 West 81st Street, Los Angeles, CA 90047, a doorknob at the front door entryway was loose and not fastened to the door. The heating vent on the floor in the kitchen area was covered with a wooden board and uneven carpet. Also, a phone dock in the kitchen was hanging from the wall and dragging on the floor. There were tiles missing from the wall in the first bathroom and bathroom drawers were covered with graffiti and filled with trash. There was a hole in the hallway drywall and needed repair. Inside Bedroom Two, a window was missing the frame to keep the glass pane in place.

At Site Two, located at 4736 11th Avenue, Los Angeles, CA 90043, Bathroom One had a hole in the ceiling above the bathtub that needed repair. The thermostat in the hallway was not secure and hung from the wall, and there was a small hole in the hallway wall needing repair.

At Site Three, located at 2306 W. 73rd Street, Los Angeles, CA 90047, all hampers were broken and needed to be replaced. The lock on the door which leads to the basement was broken and needed to be repaired or replaced. Further the bedrooms did not have doors for privacy and needed to be installed.

The Administrator stated that all of the items noted for all sites were repaired or replaced immediately. The only exception were the doors at Site Three because more solid, durable doors needed to be ordered. The monitor verified that the doors were installed on September 15, 2011.

Recommendations:

Dangerfield's management shall ensure that:

2. Dangerfield's common quarters are well maintained in accordance with Title 22 Regulations.
3. The children's bedrooms are well maintained in accordance with Title 22 Regulations.

MAINTENANCE OF REQUIRED DOCUMENTATION AND SERVICE DELIVERY

Based on our review of five children's case files and/or documentation from the provider, Dangerfield fully complied with six of 13 elements reviewed in the area of Maintenance of Required Documentation and Services Delivery.

We noted that of the 10 initial and updated NSPs reviewed, one was not timely and seven were not comprehensive in that they did not complete all the required elements in accordance with the NSP template. In addition, one child did not participate in the development of her NSPs; there was insufficient documentation indicating the DCFS CSWs' authorization to implement the NSPs and monthly contacts with the CSW were not appropriately documented.

The review further revealed that one of the five sampled children was not progressing toward meeting the NSP goals. The Administrator stated that staff will be given further training to address all required sections in the NSP to ensure NSPs are comprehensive and that children progress towards achieving their NSP case goals.

Recommendations:

Dangerfield's management shall ensure:

4. All age-appropriate children participate in the development of the NSP.
5. NSPs are comprehensive, including all required elements in accordance with the NSP template.
6. NSPs are developed in a timely manner.
7. Monthly contacts with CSWs are appropriately documented.
8. Obtain or document efforts to obtain the DCFS CSWs' authorization to implement the NSPs.
9. Placed children are assisted with progressing toward meeting the NSP case goals.

EDUCATION AND WORKFORCE READINESS

Based on our review of five children's case files and/or documentation from the provider, Dangerfield fully complied with six of eight elements reviewed in the area of Education and Workforce Readiness.

We found that three of the five children did not attend school as required, and three children did not make progress toward their academic performance and/or attendance. The Administrator stated that an incentive program was developed to increase resident's school attendance and improve their grades. The facility manager or their designee made regular visits to the school one to two times a month to follow-up on residents' progress. The Dangerfield staff has also been working with the LAUSD Neglected & Delinquent Program as of September 30, 2011, to enlist their assistance in obtaining IEPs, credits from previous schools and collaboration with teachers regarding any problems with attendance or grades. All school contacts by phone and in person were documented in the child's record on a school log.

Recommendations:

Dangerfield's management shall ensure:

10. All children attend school as required.
11. Children's academic performance and/or attendance increase.

HEALTH AND MEDICAL NEEDS

Based on our review of five children's files and/or documentation from the provider, Dangerfield fully complied with five of six elements reviewed in the area of Health and Medical Needs.

We noted that one child did not have an initial medical examination conducted. The Administrator stated she would ensure children receive timely medical examinations.

Recommendation:

Dangerfield's management shall ensure:

12. All children receive initial medical examinations.

DISCHARGED CHILDREN

Based on our review of three children's files and/or documentation from the provider, Dangerfield fully complied with one of three elements reviewed in the area of Discharged Children.

We found that none of the discharged children were discharged according to their permanency plan, and none successfully met all of their NSP goals prior to their discharge. The Administrator stated that an incentive plan was developed to encourage children to work on their goals and follow their plan for discharge.

Recommendations:

Dangerfield's management shall ensure:

13. They work with the CSW to ensure children are discharged according to the permanency plan and/or document their efforts.
14. The children are assisted with making progress toward meeting their NSP goals prior to their discharge.

PERSONNEL RECORDS

Based on our review of four staff personnel files and/or documentation from the provider, Dangerfield fully complied with 12 of 13 elements reviewed in the area of Personnel Records. One element was not applicable because none of the reviewed staff were due for the annual on-going training.

A review of the Personnel Records revealed that one staff did not meet the job experience requirement per Dangerfield's program statement. The staff, however, did meet the minimum requirements per Title 22 Regulations. The Administrator attempted to resolve the issue by creating a new job position, Child Care Trainee. This change in the program statement has not been approved by DCFS and CCL. The employee has since met the requirement for the position of Childcare Worker. The Administrator stated that beginning immediately, she will review employment verifications for all prospective employees and the Agency will only hire employees who meet the qualification per their program statement.

Recommendation:

Dangerfield's management shall ensure:

15. All staff members who have direct contact with children meet the educational/experience requirements.

FOLLOW-UP FROM THE OHCMD'S PRIOR MONITORING REVIEW

Objective

Determine the status of the recommendations reported in the OHCMD prior monitoring review.

Verification

We verified whether the outstanding recommendations from our prior report issued on April 27, 2011 were implemented.

Results

The OHCMD's prior monitoring report contained eight outstanding recommendations. Specifically, Dangerfield was to ensure that runaway procedures were maintained in accordance with the contract; SIRs were cross-reported to all required parties via I-Track in a timely manner; NSPs were comprehensive, including all required elements in accordance with the NSP template; and Youth Development Services (YDS) and Emancipation Planning were provided and children attended in accordance with the developmental expectations of the child. Additionally, Dangerfield was to ensure that

children received initial medical and dental examinations within 30 days of placement, children received follow-up medical and dental examinations, and children were allowed to make and receive private telephone calls.

Based on our follow-up of these recommendations, Dangerfield fully implemented six of eight recommendations. Dangerfield did not implement the OHCMD's recommendation regarding development of comprehensive NSPs and ensuring that children received timely initial medical examinations and follow-up dental examinations. Corrective action was requested of Dangerfield to further address the recommendations that were not implemented.

Recommendation:

Dangerfield's management shall ensure:

16. Full implementation of the outstanding recommendations from OHCMD's prior monitoring report, which is noted in this report as Recommendations 5 and 12.

MOST RECENT FISCAL REVIEW CONDUCTED BY THE AUDITOR-CONTROLLER

A fiscal review of Dangerfield has not been posted by the A-C.

April 4, 2012

TO: Patricia Bolanos-Gonzalez, DCFS MANAGER. OUT-
OF-HOME CARE MANAGEMENT DIVISION *Via*
fax #626-572-2368

FROM: LORRIE IRVING, DIRECTOR
DANGERFIELD GROUP HOME PROGRAM

RE: **ADDENDUM CORRECTIVE ACTION PLAN:**

The following information is the Corrective Action Plan for Dangerfield Group Home for the "Compliance Monitoring Review Evaluation" conducted on June 28, 2011.

1. License/Contract Requirements:

Facility #1 and #3—not all sign in/out logs include staff's signature

Plan: All staff will be trained by their facility manager by **9/19/11** as to the procedure for signing residents in and out of facility, including mandatory staff signatures, dates/times out and in. Once the training is completed a copy of the attendance sheet(s) will be sent to our monitor. If any of the staff misses the initial training, a make-up training will be scheduled to ensure that all staff is re-trained. Beginning immediately child care staff will be responsible for completing all sign in/out log sheets for each resident. The Facility manager at each facility will review the log sheets for each **resident each morning in order to make sure** there have not been any omissions. On Monday morning, the Facility manager will review the weekend entries by staff. When an omission/error/question occurs the facility manager will talk with the staff responsible in person or by phone in order to update/correct the log sheets.

II. Facility and Environment:

Repairs needed at facilities #1:

1. Doorknob at entryway loose and not fastened to door
2. Doorbell not functioning properly
3. Area of carpet covered with wooden board & uneven with carpet
4. Phone dock in kitchen hanging from wall & dragging on floor
5. Tiles missing from wall in 1st bathroom
6. Drawers covered with graffiti & filled with trash in 1st bathroom
7. Hallway drywall broken and needs to be fixed or replaced.
8. Bedroom #2 a window is missing a frame for the glass
9. Bedroom #3 side windows too small for escape during emergency

Repairs needed at facilities #2:

10. Bathroom #1 has hole in ceiling above bathtub that needs closing
11. Thermostat in hallway not secure and hanging from wall
12. Hallway has a small hole in wall needing repair

Repairs needed at facilities #3:

13. Detergent not safely locked away
14. All hampers broke and need replacement
15. Entry lock broken for basement & needs to be repaired/ replaced
16. Bedrooms #1 through #3 do not have doors & must be replaced
17. Bedroom #3 has a bent curtain rod needing to be replaced

Plan: All of the items noted for Facility #1, #2 and #3 have been repaired. The only exception is Item #16 because the doors needed to be ordered (this was done to obtain solid more durable doors). The doors will be completed by 9/19/11. Pictures are attached for the completed repairs. Item #13 was corrected immediately and each staff completed a mandatory review of all items in the facility needing to be *securely locked* and documented the review on a form to be maintained in their personnel file, see attached.

Beginning immediately a QA team member will do a facility inspection twice a month, on the 1st and 15th day of each month. The inspection form will document all concerns and will be submitted to the Administrator within 24 hours. Any immediate concerns/deficiencies will

be addressed by the QA person-at the time of the inspection. The Administrator will ensure that the needed repair person does the work within 5 days.

III. Maintenance of Required Documentation and Service Delivery:

NSPs need to be approved by CSW, residents need to participate in the development and sign timely, and the reports need to be comprehensive in all of the sections, especially with regard to progress, quality of family visits and medical treatment received. Children need to successfully meet their goals. CSW monthly contacts are not documented

Plan: Beginning immediately, the assigned group home social worker will create a more detailed and comprehensive report by conferring with the child's facility manager, child care staff, therapist and the group home administrator. The GHSW will also complete a review of all chart documentation, report cards, visitation logs and SIRs on the child for the period being done. This will ensure that the GHSW is able to address all areas required in the NSP report, including, but not limited to more detailed progress for the updated NSP reports, quality of family visits and documentation of all medical treatment received and all follow-up visits.

Children's participation will be rewarded through the incentive program in order to encourage their cooperation to work together with the GHSW in developing and updating, when needed, the goals. Should the resident refuse to sign their report for any reason, the child's facility manager will indicate 'refused' on the resident signature line and put their 1st initial and last name. Once each report is completed, it will be sent to the CSW for their review and signature and it will be documented in the CSW Log'.

An updated QA form has been developed to include all necessary components needing to be documented, see attached. All reports will be reviewed by the administrator and/or QA person 5 days prior to the due date, ensuring reports are correctly written and all documentation is included.

In order to address the ways to document progress with resident's goals, the agency Administrator will schedule a re-training for all child care workers and facility managers called, "Understanding, Documenting and Implementing Needs and Services Plans". The training will be held by 10/14/11. (Proof of this training will be forwarded to DCFS Group Home Monitor at its completion.) Although child care staff have full knowledge of each resident's goals (located in the child's 'daily log book'), proper documentation of the child's progress needs to be followed.

In order to assist children in achieving their goals, an incentive program will be developed. Whenever a goal does not seem to be working, the child will participate in making any change to the goal. Documentation that the CSW has been notified (by phone or email or fax) of any and all changes to this plan and will be noted on the CSW log.

The CSW will be contacted at least monthly to discuss progress and concerns, per the contract. Beginning immediately this contact will be documented on the CSW LOG. The QA staff will do monthly reviews for each child to make sure that there is a contact indicated for each child. The Administrator will meet with QA staff monthly to make sure all contacts have been completed and documented.

IV. Education and Workforce Readiness:

Residents not attending school 100% of the time, lack of improvement in grades.

In order to increase residents school attendance to 100% of the time the treatment team will develop an incentive program. This program will reward children for getting up and going to school each day. Additional incentives will be added when the child also stays at school and attends all classes for the day. Each child will take an attendance sheet to school daily and return it to the facility manager when they return home. This program will be in place no later than November 04, 2011. This will allow time for the development of the program, presentation to the residents and training for all staff.

The incentive program will also be used to improve resident grades. Also, the facility manager, or their designee, will make regular visits to the school one to two times a month. They will make contact with the school counselor and/or the teachers. They will ask teachers what the child can do to improve their grades including possibilities for extra credit. The group home will also work with the LAUSD Neglected & Delinquent Program beginning 9/30/11 to enlist their assistance in obtaining IEPs, credits from previous schools and collaboration with teachers regarding any problems with attendance or grades. All school contacts by phone and in person will be documented in the child's record on a school log.

The group home continues to offer on-site tutoring twice a week to all of the children and the treatment team will include working with the tutor as part of the above mentioned incentive program.

V. Health and Medical Needs:

Not all children's files contained complete medical examinations. One initial medical was not complete and only contained a pregnancy test.

Plan: Initial physicals will be scheduled within 7 days of admission by the facility manager to ensure they get completed timely. Two weeks after admission for all children, the QA team will verify whether a resident's medical and dental evaluations have been scheduled. If needed QA will work with the facility manager to secure all needed appointments.

If the child refuses to go to the doctor or dentist, the child will sign a refusal and their CSW will be notified immediately and this will be documented in the 'CSW Log'. The Facility manager will schedule another appointment for the child. The Administrator will make sure that staff follows this procedure.

VI. Psychotropic Medication:

No issues noted.

VII. Personal Rights and Social/Emotional Well-

Being: No issues noted.

VIII. Personal Needs/Survival and Economic Well Being:

No issues noted.

IX. Discharged Children:

Discharge summaries were incomplete and children discharged who were placed for 30 days or more did not meet their NSP goals.

Plan: Each discharge plan will be typed and completed thoroughly by the group home social work staff.

We will meet the contract benchmark which states that at least 62% of placed children successfully meet the Needs and Services Plan goals as well as

discharge plan. In order to meet the contract benchmark for 62% of all discharged children, an incentive plan is being developed to encourage children to work on their goals and follow their plan for discharge. Each child will review their discharge case plan and begin NSP goal development within two weeks of admission with the GHSW. Thereafter this review will be done on a monthly basis with to discuss progress and concerns. GHSW will make a note of this review with the child in their resident file, including any barriers preventing them from being successful. If a discharge plan/NSP goal needs to be modified, the minor and GHSW will develop a draft.. The proposed changes will be submitted to the treatment team for approval. The CSW will be notified of any change in NSP goals/discharge plan and their approval will be documented and the CSW contact will be noted on the CSW Log.

X. Personnel Records:

One child care staff had 'no experience' in group home care.

As of April 4, 2012 the Administrator will not hire any new staff that doesn't meet requirements per Agency Program Statement. Prior to new staff being hired, Dangerfield (Administrator) will have verification of their previous employment and experience regarding Residential Care.

THE DIRECTOR, LORRIE IRVING, WILL BE RESPONSIBLE FOR ENSURING THAT THE CAP IS FULLY IMPLEMENTED.

Sincerely,

Lorrie Irving
Director
